THE LINUX INTERVIEW BIBLE

Your Definitive Guide to Ace Linux Job Interviews

• Essential Q&A • Expert Tips • Real-world Scenarios •

By Ramesh Singh

Linux Basic

1. What is Linux?

Linux ek **open-source operating system** hai jo Unix based hai. Ye servers, cloud, aur embedded systems me widely use hota hai.

2. What is open-source?

Open-source ka matlab hai **source code publicly available hota hai**, koi bhi use, modify aur distribute kar sakta hai.

3. Difference: Linux vs Windows, Linux vs Unix

Linux vs Windows

- Linux: Open-source, free, secure
- Windows: Closed-source, paid, user-friendly GUI

Linux vs Unix

- Linux: Free, community-driven
- Unix: Licensed, vendor-based (like IBM AIX)

4. Kernel & OS

- **Kernel**: OS ka core part (hardware + software ke beech bridge)
- **OS**: Complete system (kernel + utilities + UI)

5. ls / ll options

- `ls` → list files
- `ls -l` → detailed view
- `ls -a` → hidden files
- `ls -lh` → human readable size
- `ll` → alias for `ls -l`

6. File create karne ke tarike

```
touch file.txt
vi file.txt
cat > file.txt
echo "text" > file.txt
```

Ramesh Singh

7. Vim me word search

```
/root
```

Next match: `n`

8. Vertical & Horizontal view (vim)

- Vertical:

```
:vsplit file.txt
```

- Horizontal:

```
:split file.txt
```

9. Replace "root" → "superuser"

```
:%s/root/superuser/g
```

10. Find file /eraser

```
find / -name "eraser"
```

11. find vs locate

- `find` → real-time search
- `locate` → database-based (fast but may be outdated)

12. Files of size 5MB

```
find / -size 5M
```

13. Files between 10MB–50MB

```
find / -size +10M -size -50M
```

14. find options

- `-name`
- `-type`
- `-size`
- `-user`
- `-mtime`
- `-perm`

Ramesh Singh

15. Difference

- `ls -l vs ll` → same (ll is alias)
- `ls -d` → directory name only
- `ls -ld` → directory details

16. Fields of ls -l

Example:

```
-rw-r--r-- 1 user group 1024 Apr 8 file.txt
```

- Permissions
- Links
- Owner
- Group
- Size
- Date
- Filename

17. Copy data file to another

```
cp file1 file2
```

18. Password protect file

```
chmod 600 file.txt
```

(ya encryption tools use kar sakte ho like `gpg`)

19. Append file

```
echo "text" >> file.txt
```

20. Difference between two files

```
diff file1 file2
```
